

SURIYA ISLAM AFRIN

Front-End Developer | CSE Graduate

1,2,3,4 Anondokanon, Hrishikesh Das Road, Sutrapur, Dhaka-1100

Email: suriyaislamafrin@gmail.com | Mobile: +8801572-043140 | [GitHub](#)

SUMMARY

Enthusiastic and detail-oriented Front-End Developer with hands-on experience in building responsive and user-friendly web applications using HTML, CSS, JavaScript, React.js, and Tailwind CSS. Skilled in integrating REST APIs, creating reusable UI components, and developing clean, maintainable code. Familiar with Git and GitHub for version control and eager to learn modern web technologies while contributing to real-world projects in a collaborative environment.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science and Engineering (CSE) | Jan 2022 - Dec 2025

CGPA: 3.36/4.00 | University of Asia Pacific (UAP), Dhaka, Bangladesh

Higher Secondary Certificate (HSC) | 2020

GPA: 5.00/5.00 | Birshrestha Munshi Abdur Rouf Public College

Secondary School Certificate (SSC) | 2018

GPA: 5.00/5.00 | St. Francis Xavier's Girls School and College

TECHNICAL SKILLS

Front-End: HTML5, CSS3, React, Tailwind CSS, JavaScript, React

Back-End: REST API Integration

Tools: Git, GitHub

PROJECTS

[WhatsApp UI Clone](#)

Built a responsive WhatsApp-inspired user interface using React, JavaScript, and Tailwind CSS. Designed reusable components for chat lists, messaging screens, navigation, and user profiles while ensuring a mobile-friendly and modern user experience. Applied component-based development and responsive design techniques to replicate a real-world messaging application.

Technologies: React.js, JavaScript, Tailwind CSS, Responsive Web Design.

[Hater-Kaz – Technician Finder Web Application](#)

Developed a location-based service marketplace that helps users discover and connect with nearby technicians across multiple service categories. Built a modern, responsive, and mobile-first user interface using React, Tailwind CSS, and Vite, ensuring an intuitive user experience across devices. Implemented category-based navigation and search functionality to streamline technician discovery and service exploration. Leveraged reusable React components and a scalable frontend architecture to improve maintainability and performance. Deployed the application on Netlify with GitHub-integrated continuous deployment for efficient development and updates.

Technologies: React.js, JavaScript (ES6+), Tailwind CSS, Vite, Responsive Web Design, Component-Based Architecture, Git, GitHub, Netlify.

Weather Update App

Developed a responsive weather application that retrieves and displays real-time weather information for any searched city using a REST API. Implemented dynamic weather reporting features including temperature, humidity, wind speed, precipitation, and feels-like temperature. Built a unit conversion system allowing users to switch seamlessly between Celsius, Fahrenheit, and Kelvin measurements. Designed a clean and intuitive user interface using HTML, CSS, and JavaScript, focusing on usability and responsive design. Deployed the application on Netlify and maintained the source code using Git and GitHub.

Technologies: HTML5, CSS3, JavaScript (ES6+), REST API, Responsive Web Design, Git, GitHub, Netlify.
